## VISION AND POSITIONING

# VILLA D'ESTE

Villa d'Este, the historic residence overlooking Lake Como and a emblem of international hospitality, is a place where tradition, elegance and innovation meet naturally.

Just a short distance from the city of Alessandro Volta, inventor of the first electric direct current generator, this unique venue combines heritage and future, providing an iconic and meaningful backdrop for showcasing the evolution of electric mobility on water.

# ELECTRIC YACHTING: THE ELECTRIC FUTURE

Everything is ready for the **sixth edition** of “Villa d’Este Style Electric Yachting,” an event dedicated to mobility, sustainability, and innovation in electric boating.

**Electric leisure boat companies and technology companies** will have the opportunity to showcase their creations and develop a **tailored program** within the extraordinary setting of Villa d’Este to promote their products, invite clients or business partners, welcome specialized press, and create exclusive opportunities for testing and sales.

# THE CONTEXT

Villa d'Este renews its commitment to promoting electric mobility applied to sustainable boating, further establishing **Villa d'Este Style – Electric Yachting** as a benchmark event within the Italian landscape.

Set in one of Europe's most emblematic environment, the event stands as a platform for dialogue among institutions, industry, universities and territory, at a time when electric navigation is moving from the experimental phase to an increasingly concrete maturity.

Lake Como, with its strong nautical tradition, international appeal and symbolic value, represents the ideal environment to support and embracing this evolution.

## THE VISION

**Villa d'Este Style – Electric Yachting** was conceived with a clear vision: to support **the evolution of electric navigation** within an authoritative, measured and international context.

Not merely an event dedicated to technology, but a moment of reflection on the **future of mobility on water.**

A place where innovation, environmental responsibility and the culture of navigation converge to define new standards of sustainability and quality.

**Villa d'Este** assumes the role of guarantor of this balance, bringing together tradition and future.

## AMBITION 2026

The 2026 edition marks a step forward in maturity for **Villa d'Este Style – Electric Yachting**. Having consolidated its role as a benchmark within the Italian electric boating landscape, the event now aims to further strengthen its positioning through:

- Increasingly high-level institutional and technical dialogue.
- A stable and carefully selected professional community.
- A concrete exchange between technological, innovation and environmental responsibility.
- A progressively international outlook.

Electric Yachting 2026 goes beyond showcasing the state of the art; it actively contributes to shaping the debate on electric mobility applied to navigation, in alignment with the legacy of Villa d'Este and the ongoing evolution of the sector.

VISION AND POSITIONING

# THE PROJECT

The 2026 edition of Villa d'Este Style – Electric Yachting is structured around three complementary dimensions.

- **Demonstration**

On-water operational sessions designed to showcase solutions and performance in a real-life setting, highlighting innovation and design excellence.

- **Dialogue**

An institutional and technical forum dedicated to fostering discussion among companies, institutions, universities and industry professionals, with the aim of sharing visions and perspectives on the future of electric navigation.

- **Connection**

A high-profile environment that encourages meaningful encounters, exchange of expertise and the development of strategic relationships.
